Question

The meter was originally defined so that what feature of the Earth had a length of 10 million meters?

Answer

The distance between the equator and the poles (we'll also accept "one-quarter of the circumference" although that isn't precise due to the fact that the Earth is not a perfect sphere)

Question

Complete the line of the first line of this poem, which has been called “The Brooklyn National Anthem”: “Spring has sprung, _____” (four words)

Answer

The grass is ris (spelling not important, but the vowel in “ris” is a short I). Here is the full poem:

*Spring has sprung, the grass is ris,
I wonder where the boidies is
The boid is on the wing,
But that's absoid
From what I hoid
The wing is on the boid!*

Question

The cartoon shown here was meant to demonstrate the danger of which political practice with a portmanteau name?

Answer

Gerrymandering (“gerrymander” being a portmanteau of “Gerry”, the last name of politician Elbridge Gerry, an early proponent of rigging the shape of electoral districts, and “salamander”, because the new districts appeared salamander-shaped)

Question

Generally, the term “kilobyte” is not used precisely; it can refer to either 1 kB (one “true” kilobyte) or 1 KiB (one kibibyte). What is the difference between these two quantities?

Answer

1 kB is 1000 bytes
whereas 1 KiB is
 2^{10} bytes =
1024 bytes. So the
difference is
24 bytes.

| Multiple-byte units | | | | |
